## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23 rejected under 35 U.S.C. 103(a) as being unpatentable over Momirov, (US 6,320,859).

As per claims 1-23, Momirov teaches a method, comprising:  
configuring a network link adapter (switch device, 200, Fig. 2) to write to an address of a memory (switch memory/Memory Manager, 110 or 255, 115) when data received from a first device (first port interface) is intended for a second device (second port interface);  
observing data traffic between the network link adapter and the memory;  
and forwarding the data to the second device when the network link adapter writes the data to the address. (Abstract, col. 2, lines 48-67, col. 3, lines 58-col. 8)

Momirov does not expressly teach wherein the data is image data however Momirov teaches wherein other types of data may be transmitted over the switch network, therefore, it would have been obvious to one of ordinary skill at the time the invention was made that Momirov would have been motivated to implement other types

of data because doing so would add and expand the flexibility of Momirov's switch network device system.
